

Environmental Policy Statement

Stewart Associates (the Practice) recognises the potential impact of its work activities have on the environment in terms of emissions to air, water and waste generation and seeks to minimise this as far as is reasonably practicable. It also recognises the influence and effect the Practice's design projects may have on the wider community.

We are committed to:

- Continual improvement in our environmental performance
- Preventing pollution
- Compliance with all environmental legislation, regulations, authorisations and any other requirements relevant to the industry sector in which we operate.

It is the policy of Stewart Associates to:

- Make efficient use of natural resources by conserving energy and water, minimising waste and recycling where possible;
- Meet our duty of care requirements in relation to waste by ensuring the safe keeping, transportation and subsequent recovery or disposal of waste;
- Our designs in layout, form and material specification, are prepared with due regard to their effect on the environment;
- Recommendations are made for the adoption of sustainable measures in our designs;
- Actively promote the use of recycled materials whenever these can be commercially justified;
- Encourage members of staff to feedback to management about the Practice's environmental performance;
- Set environmental objectives and publish them in the Practice's promotional literature;

We will communicate this policy to all our employees and ensure that they are given appropriate training to raise awareness of environmental issues. Stewart Associates will review this policy as part of the Management Review Meeting agenda, taking into account of any changes within legislation and our organisation, and other factors.
